RF AI Chat MOD - Installation Guide

Ravenfield mod - BepInEx plugin + mod package

1. Before You Start

1. This mod requires BepInEx 5.4.23.5 (Ravenfield build). If BepInEx is already installed, skip to step 2.

2. Make sure the game root contains BepInEx/plugins/ and ravenfield_Data/mods/.

2. Files to Install (2 files)

Place the files from this package as follows (paths are relative to the game root):

BepInEx/plugins/RF.AiChat/RF.AiChat.dll

ravenfield_Data/mods/RFAiChatUI/RFAiChatUI.rfc

3. Launch and Enable

1. Launch the game -> Mutators -> enable "RF AI Chat".

2. Open the mod settings and fill in your own OpenAI-compatible API URL and API key (default: https://api.deepseek.com/v1 , model deepseek-chat).

3. Click "Connection Test" to verify, then start a match; press Y in-game to open chat input .

4. Settings Overview

Language / Input key / Speech rate / Fonts / Chat box size / Name colors / Dead-AI speech / Auto report interval.

The settings UI is always bilingual (Chinese / English). Right-side buttons: Prompts / Persona / Knowledge Base.

5. FAQ

- No lines? Check API key, model name and network. Use Connection Test for details.

- Garbled text? Make sure only the latest DLL is installed.

- Restore vanilla: delete the two files above (and BepInEx/config/rf.aichat.bridge.cfg).

6. Verification

See SHA256.txt in this package. First 16 chars of SHA-256 are enough to identify the build.
